

Earth

The Earth is in the solar system

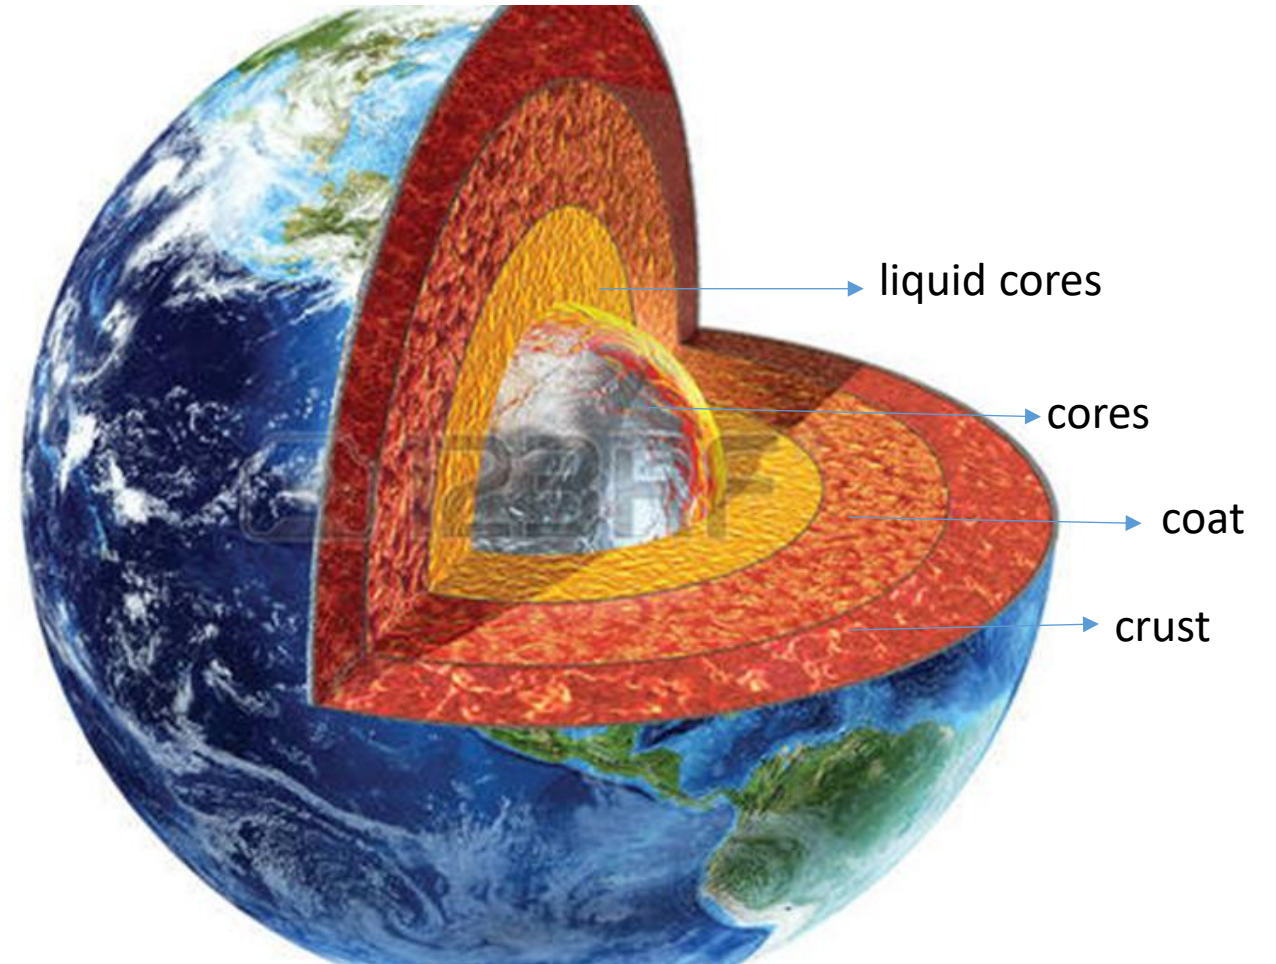

Identity Record

- one orbit of Sun : 365,3 days
- one rotation : 23hours and 56min
- distance from Sun : 150 million kilometers
(93 million miles)
- average temperature : 7.2°C
(45°F)
- mass : 6×10^{24} kg

Telluric Planet

A telluric planet (from the latin tellus 'Earth sod'), in opposition to the gaseous planet, it is a planet composed mainly of rock and metal that generally has three concentric envelopes (core, mantle and crust).

The Earth has one moon, its name is Luna.
